Installation manual of AJ10 International dental chair
1 Introduction

1.1 Product information

• **Name**: Dental chair
• **Model**: AJ10 International
• **Working conditions**:
  ① Ambient temperature: 5 °C ~ 40 °C;
  ② Relative humidity: ≤ 80%;
  ③ Air pressure: 86 kPa ~ 106 kPa;
  ④ Nominal voltage: AC110 V ± 22 V;
  ⑤ Nominal frequency: 60 Hz ± 1 Hz;

3 Parameters

3.1 Specifications

Load bearing

Patient bearing: Max 135kg

Tip: Specifications are subject to change without notice.

3.2 Size (unit: mm)
4 Preparations

4.1 Attentions

Before install the unit, you should:

• Clear all the debris in the room, and clean the floor thoroughly.
• Apply two manually operated valves for the air and water source.
• Exhaust the dirty water and air before connecting.
• May have no necessity to use all the component described in this document when installing. Components should be evaluated before installation.

Before install the unit, please read the manual carefully:

• Input voltage AC110 V ,60 Hz.
• Make sure the dental unit is in good grounding.
• All the electrical components and connections should be made by an authorized technician.
• Only fuse and accessories recognized by ADS technician can be used.
• This device should not operate in the environment of high temperature, high humidity, vibration, flammability, unbalance, or dusty.
• Only the authorized spare parts can be used in this device.
• This dental unit should not come into contact with any object in its operational range of movement.
• This device can not be used in the environment of strong magnetic, electromagnetic.

Leather maintenance:

• 1、No organic solvent or alkaline detergent (such as: gasoline, alcohol, etc.), or the leather will crack, be smelly or fade;
• 2、No exposure, keep the room in good ventilation (exposure can cause the leather crack, bad ventilation lead to go mouldy);
• 3、Mention the patient to remove edged tools (like keys) before operation, to avoid scratch the leather.
4.2 Tools recommended

The tools and instruments need to prepare before installation.
4.3 Installation requirements

Note: Sizes above are the minimum that required.

5 Installation

5.1 Place the chair

1. Remove all debris and cardboard around the chair.
2. Hold the handrail and the front of the frame, uplift the chair and place the chair on the right place.
3. Remove binding belt and packages.
5.2 Fix the chair

**Attentions:**
1. The chair must be fixed on the floor for ensuring stability, for it can be seriously damaged by wrong fixation.
2. Check out the material of the floor on the installing place. Please contact the authorized contractor to thickening the floor if its thickness is less than 82 mm.

1. Power on and activate the unit.
2. Step the button on foot control, raise the unit.
3. Unit switched off and power disconnected.
4. Remove the cover and mark the installing position, then move the unit away.
   Drill on the marked position, press the explosive bolt, then return the unit to its position and tighten the screw.
5.3 Install the backrest

Fix the backrest on the chair frame with three M10*45 screws.
